⁽⁹⁾ For the 480V grid: up to 19,250W per string may be installed with 2 strings and 22,000W when 3 strings are connected to the inverter. Maximum power difference between each string is 2,000W.

⁽⁶⁾ It is not allowed to mix M1600 with any other optimizer models in any string, connected to the same inverter.
(7) In case the number of PV modules in the string is not a multiple of 4, it is allowed to install one M1600 power optimizer connected to one, two or three PV modules. Do not leave M1600 primary inputs unconnected.

⁽⁸⁾ For the 400V grid: up to 17,250W per string may be installed with 2 strings and 20,000W when 3 strings are connected to the inverter. Maximum power difference between each string is 2,000W
