⁽⁷⁾ It is not allowed to mix P860/P960 with P730/P800p/P850/P950/P1100 in one string or to mix with P370-P505 in one string.

⁽²⁾ In a case of odd number of PV modules in one string, it is allowed to install one P860/P960 power optimizer connected to one PV module. When connecting a single module to P860/P960, seal the unused input connectors with the supplied pair of seals.
(3) NEC 2017 requires max combined input voltage be not more than 80V.

⁽⁴⁾ For other connector types please refer to: https://www.solaredge.com/sites/default/files/optimizer-input-connector-compatibility.pdf

⁽⁵⁾ Longer inputs wire length are available for use with split junction boc modules. For options 2, order P860-xxxYxxx.

⁽⁸⁾ For the 230/400V grid: up to 15,750W per string may be installed when the maximum power difference between each string is 2,000W.
